

## Internal/external rodent resistant FO cable for use in cable ducts

Internal/External FO cable, with corrugated steel armour, 24f, SM 09/125 OS2, LSZH, 2700N, black

### SPECIFICATION

|                             |                                                |
|-----------------------------|------------------------------------------------|
| Fiber quantity              | 24 fibers                                      |
| Cable design                | Round cable with corrugated steel armour       |
| Cable Outer Diameter, mm    | 7,8 mm                                         |
| Outer Jacket Material       | UV-LSZH                                        |
| Fiber type                  | SM 9/125 OS2                                   |
| Fire safety                 | П16 (testing acc. to ГОСТ IEC 60332-3-22-2011) |
| Jacket colour               | Black                                          |
| EN50575 CPR Cable EuroClass | no                                             |

### Part Numbers

|          |                                                                                                  |
